

JA

GUARANTEED MINIMUM ANALYSIS
Methyl Jasmonate.....0.025%

Jasmonic acid and its derivatives are natural plant hormones that play a role in growth and protection against environmental stress. Jasmonate hormones are also used by plants for long range signaling; when one plant is under stress, it not only releases jasmonates to protect itself, but also uses them to warn neighbouring plants to prepare. Apply **EZ-Gro JA** to increase crop survival during abiotic stress.

ATTENTION

Keep out of reach of children and animals

Product contains soy. Adverse reactions may occur in sensitive persons | Wear dust mask and protective gloves. If skin contact occurs, wash with soap and water. If allergic reaction occurs, seek medical attention. | Avoid release to water sources. | Store in tightly closed container, in a dry, well ventilated area. | Dispose of contents and packaging in accordance with local, regional and federal legislation.

LOT NUMBER:

Manufactured By: Hicrocorp Inc., 605 Justus Dr., Kingston, Ontario K7M 4H5 | 613-384-8882
Registration Number 2018135S Fertilizers Act

APPLICATION CHART:

Apply with enough water for coverage

MG AI/HA = mg active ingredient per hectare

CROP	MG AI / HA	ML PRODUCT / HA	APPLICATION TIMING
Spring Wheat	50	200	At 8-12 leaf stage
