

EZ-SEA

GUARANTEED MINIMUM ANALYSIS

Total Nitrogen (N).....	2.0%
Available Phosphate (P ₂ O ₅).....	1.0%
Soluble Potash (K ₂ O).....	0.3%
Calcium (Ca).....	0.7%
Sulfur (S).....	1.3%

EZ-SEA fish and oceanic hydrolysate boasts immune-boosting properties that can help improve plant resistance. It can also aid in root expansion for better access to water and nutrients. Additionally, it can help to replenish unproductive soil by promoting beneficial organisms that provide both macro- and micro-nutrients to your plants. **EZ-SEA** is bio-active and can accelerate the break down of soil nutrients and increase nutrient levels in the soil.

CAUTION: Product contains fish and shellfish. Adverse reactions may occur in sensitive persons. If skin contact occurs, wash with soap and water. Wear dust mask and protective gloves. If allergic reaction occurs, seek medical attention.

FIRST AID: Do not ingest. Wash hands and other exposed skin with water and soap before eating. If splashed on eyes, rinse out thoroughly with clean water and seek medical attention. If ingested, drink plentiful amounts of clean water and seek immediate medical attention.

LOT NUMBER:

Manufactured By: Higrocorp Inc., 605 Justus Dr., Kingston, Ontario K7M 4H5 | 613-384-8882
Derived from registered and exempt materials.

APPLICATION DIRECTIONS

FIELD APPLICATION:

VEGETABLES: Foliar 10-20 L/ha (4-8 L/acre), every 7-10 days.

BROADACRE: 10-30 L/ha (4-12 L/acre), at planting. Apply 10-20 L/ha (approx. 4-8 L/acre) as foliar at key growth stages.

SOIL: Mix with sufficient water to cover area at a minimum dilution rate of 1 part water to 15 parts **EZ-SEA**, and spray.

CONTAINER & GARDEN APPLICATION:

IRRIGATION: 1.5-2.5ml per L water twice per week or 5ml once per week.

FOLIAR: 10-20ml per L of water and apply every 10-14 days.

GARDEN ROWS: 100ml per 10m² diluted with a minimum of 10L. Apply 2-3 times per season.

For best results, keep away from long exposure to direct sunlight. Store in temperatures above 6 °C. Let warm up to 15 °C before adding to tank. Add to tank water that is at least 15 °C. Agitate well before using. Dilute using clean, fresh water. **EZ-SEA** is compatible with many fertilizers, herbicides and pesticides but you should always perform a jar test to ensure compatibility prior to use. Keep container closed tightly. Above pH 4.5, this product will become bio-active, foam and expand.

For best results, dilute and blend **EZ-SEA** with water before adding to your tank mix. For best results, spray in the morning and do not spray in the heat of the day. Separation may occur during storage and shipment, and product may require some agitation. Apply this product only when diluted with water. DO NOT STORE or SAVE mixed solutions. Use all that you mix within 24 hours. May cause skin irritation with prolonged exposure. Avoid contact with eyes.
