

# SSP

## Superior Spreader & Penetrator

### GUARANTEED MINIMUM ANALYSIS

Polyether Modified Siloxane.....97%

**EZ-GRO SSP** is a trisiloxane surfactant that can be added to any fertilizer, supplement, or plant growth regulator. When added to irrigation water, **EZ-GRO SSP** promotes nutrient uptake, improves efficiency of irrigation and wetting, and reduces nutrient losses through leaching and runoff after rainfall. **EZ-GRO SSP** can reduce the surface tension of water, which ultimately allows your irrigation liquids to spread in or on water-repellant surfaces like leaves and soil. **EZ-GRO SSP** is a sustainable solution that allows you to conserve water and improve efficiency of irrigation, all while enhancing the growth and quality of your crops.

#### DANGER

##### Keep out of reach of children and animals

Causes serious eye damage | Harmful if inhaled | Toxic to aquatic life with long lasting effects | Wear protective equipment including clothing, gloves, eye and respiratory protection when handling this product | Avoid breathing fumes. Use only outdoors or in a well-ventilated area | Avoid release to the environment | If in eyes, rinse with water for several minutes, remove contacts if present and continue rinsing. Immediately contact a health care provider | If inhaled move person to fresh air | Collect spillage to prevent release to the environment | Store in tightly closed container, in a dry, well-ventilated area | Dispose of contents and container in accordance with local, regional, and national regulations.

### APPLICATION DIRECTIONS

**SUITABLE FOR ALL CROPS:** Add with each tank application of fertilizer, supplements, and PGR's or as required.

**TANK MIX ADDITIVE:** As a tank mix additive, **EZ-GRO SSP** can improve spray coverage, promote absorption, and reduce the amount of spray. Add to your tank mix prior to application to soil or crops to aid in the spreading, penetration and uptake of your plant growth regulator, supplement or fertilizer.

Recommended/typical usage:

- Plant growth regulator: 0.025% – 0.05% **EZ-GRO SSP** w/w
- Supplements: 0.025% – 0.05% **EZ-GRO SSP** w/w
- Fertilizers and trace elements: 0.015% – 0.1% **EZ-GRO SSP** w/w

Performs best when mixture pH is 6-8. Use within 24 hours of mixing. Apply to small test area before spraying widely on fields.

**GENERAL TURF & GOLF COURSES:** Apply 125 ml of **EZ-GRO SSP** per 100 m<sup>2</sup> of turf in monthly intervals or as required.

**NOTE:** Always follow the recommendations of your fertilizer, supplement or plant growth regulator label. Some products may not recommend mixing with nonionic surfactants. If this is indicated on the label, do not mix with EZ-GRO SSP.
