

CAL-BASE

EZ-GRO FIRE PROFESSIONAL NUTRIENT SYSTEM is a pH balanced base nutrient system designed for the both the demanding expert and beginner grower. It provides optimum plant nutrition and the #1 quality in finished flower. They can be used as a stand-alone nutrient program, or in conjunction with other fertilizers and additives, and are effective in any growing medium.

GUARANTEED ANALYSIS	
Total Nitrogen (N).....	15%
15% Nitrate Nitrogen	
Calcium (Ca).....	19%
Derived from: Calcium Nitrate	

DIRECTIONS AND FEED TABLES

Use CAL-BASE in conjunction with GROWTH or FLOWER, at a rate of 1.2 parts CAL-BASE to 2 parts GROWTH or FLOWER. Add CAL-BASE to water and mix until dissolved. Then add GROWTH or FLOWER and mix until dissolved. Use CAL-BASE from the start of vegetative stage until the final 2 weeks of flowering stage. DISSIPATE is recommended for the final 2 weeks of flowering. For best results, use HYPO continuously through-out the life cycle.

Please see the chart below for recommended feed program rates per 10 Litres of water.

STAGE	VEG	FLOWERING	
		1-7	8-9
WEEKS	1-4	1-7	8-9
Growth	20 g		
Flower		20 g	20 g
CAL-BASE	12 g	12 g	
Dissipate			50 ml
Hypo	5-13 ml	5-13 ml	5-13 ml

FOR INJECTOR USAGE:

CAL-BASE stock solution: Add 120g per 880ml of water. Set injection rates at 1:100

GROWTH or FLOWER stock solution: Add 200g per 800ml of water. Set injection rates at 1:110.
