

Nature's Nectar

Nature's Nectar is the worlds first all natural, organic nutrient that is compatible with hydroponics, soil, cocoa gardening and drip irrigation. Nature's Nectar is the leading natural organic nutrient in commercial food and fruit production. Nature's Nectar solution contains no sediment and has been manufactured so all nutrients are instantly available to your plant. Nature's Nectar, for exceptional growth, quality and yield.

Mixing Instructions: Hydroponics, Cocoa, Drip irrigation

Nitrogen2ml / litre (1.5 oz. / 5 gal.)
Phosphorus3ml / litre (2.25oz. / 5 gal.)
Potassium3ml / litre (2.25oz. / 5 gal.)
 • Double mixing rates for heavy fruiting.

Mixing Instructions: Soil

Same as above 2x / week. There are no special procedures for soil growing.

Natures Nectar organic gardening tips for hydroponics.

- Adjust pH as necessary.
- Clean all equipment between grow cycles.
- Change reservoir weekly.

FERTIGATION (DRIP/TRICKLE/SPRINKLER IRRIGATION) AND IN-FURROW/SIDE DRESS APPLICATION RATES		
CROP	USE RATE	Application Timing
Berries Such as: blueberries, raspberries, cranberries, strawberries, et al.	3 – 4 pts/acre	Begin applications approximately 14 days after transplanting and continue until early fruit ripening.
Vegetables Such as: Brassica or cole crops, et al.	1.5 – 3 pts/acre	In-furrow application at transplanting.
FOLIAR APPLICATION RATES AND TIMINGS		
Crop	Rate	Spray Volume
Vegetable crops (Open Field) Such as: fruiting vegetables (pepper, tomato), cucurbits (melons, cucumber, squash), Brassica or cole crops, leafy vegetables, et al.	1.5 – 3 pts/acre	Use 1.5 – 2 pts/acre in low volume applications, and use 3 pts/acre for high volume applications.
Tree Fruit and Vine Crops Such as: apples, cherries, citrus, pear, stone fruit, kiwi, raisin, table, and wine grapes, and berry crops such as blueberries, cranberries, raspberries, strawberries, et al.	1.5 – 3 pts/acre	Use 1.5 – 2 pts/acre in low volume applications, and use 3 pts/acre for high volume applications.
Nut crops Such as: almond, pecan, pistachio, walnut et al.	1.5 – 3 pts/acre	Use 1.5 – 2 pts/acre in low volume applications, and use 3 pts/acre for high volume applications.
Field crops Such as: corn, cotton, peanuts, potatoes, rice, soybeans, sorghum, sugar cane, sugar beets, wheat, et al.	1.5 – 3 pts/acre	Use 1.5 pts/acre in low volume applications, and use 2 – 3 pts/acre for high volume applications.
Forage crops Such as: alfalfa, ryegrass, timothy, fescue, et al.	1.5 – 3 pts/acre	Use 1.5 pts/acre in low volume applications, and use 2 – 3 pts/acre for high volume applications.
Turf	2 – 4 pts/acre	Use 2 pts/acre in low volume applications, and use 3 – 4 pts/acre for high volume applications.
Ornamentals (Open Field)	1.5 – 3 pts/acre	Use 1.5 pts/acre in low volume applications, and use 2 – 3 pts/acre for high volume applications.
HYDROPONICS		
Crop	Use Rate	Application Timing
All Crops and Ornamentals	500ml / 400 liters	Apply using a 10-14 day interval.
