

Guaranteed Minimum Analysis YuccaSchidigera Extract.....50%

Yucca is a rich source of steroidal saponins, whose extract acts as a natural surfactant or wetting agent. Surfactants work to reduce surface tension between water particles, which facilitates spreading. It also enables water to spread evenly through soil, reducing the presence of dry spots and water channels. **EZ-Gro Yucca** can be added to fertilizers to increase their effectiveness and add additional protection against drought, heat, salt and UV stress. Conserve water, increase productivity and protect against dehydration by adding **EZ-Gro Yucca** to your fertilizer.

ATTENTION

Keep out of reach of children and animals. | Avoid release to water sources. | Store locked up, in a tightly closed container. | Dispose of contents and container in accordance with local, regional, and national regulations.

For Organic Use

EZ-GRO YUCCA

Nonionic Surfactant, Spreader, Activator

APPLICATION RATES:

EZ-Gro Yucca can be mixed with other fertilizers.

Wetting agent for agricultural field crops:

Add 20 ml of EZ-Gro Yucca to agrichemical sprays for every 100 L of final volume.

Horticulture:

Begin foliar application after transplant or emergence unless otherwise specified.
