Fulvic Acid 15%

Organic Liquid Product Description

Guaranteed Analysis

15% Fulvic acid
0.45% Potassium

Available Sizes

1 L
4 L
20 L
200 L
1000 L

Usage Directions:

1-2 ml per litre once a week
Foliar: 1-2 ml once or twice a week

Product Description

Ez-Gro Fulvic Acid 15% is a non-plant food soil or foliar treatment that is considered an efficient and effective method to enhance uptake of endogenous and exogenous nutrient, allowing it to optimize your fertilizer program. Fulvic acid is a potent organic electrolyte that enhances cell division and elongation, which leads to a significant root growth.

Fulvic acid also offers protection against certain abiotic stresses like drought and salinity due to its alteration of water transport and storage.

Ez-Gro Fulvic Acid 15% is a great addition to your regular fertilizer program to reap the benefits of crop protection and soil composition.

10% HUMIC

1-2 ml per litre once per week.

Foliar: 1-2 ml once or twice per week

Product Description

Ez-Gro Humic Acid 10% liquid is a non-plant food soil or foliar treatment that offers many benefits to soil and crops. Humic acid has been shown to enhance soil structure and fertilizes as well as alter nutrient root architecture to improve nutrient uptake. Use humic acid with your regular feeding program to enhance root, leaf and shoot growth and protect your plants against heavy metal toxicity.

Using humic acid can optimize your current fertilizing program by enhancing uptake of endogenous and exogenous nutrients.
